ENERGY STAR® Unit Shipment and Market Penetration Report Calendar Year 2021 Summary

This is the 20th year in which EPA has collected unit shipment data for the ENERGY STAR Program from program partners and/or their representative associations and used it to project the market penetration of ENERGY STAR certified products.

Data:

For 2021, data was collected for the following ENERGY STAR certified products:

- Audio/Video Products
- Boilers
- Ceiling Fans
- Central Air Conditioners and Air-Source Heat Pumps
- Clothes Dryers
- Clothes Washers
- Commercial Boilers
- Commercial Coffee Brewers
- Commercial Dishwashers
- Commercial Fryers
- Commercial Griddles
- Commercial Hot Food Holding Cabinets
- Commercial Ice Makers
- Commercial Ovens
- Commercial Refrigerators and Freezers
- Commercial Steam Cookers
- Commercial Water Heaters
- Computers
- Connected Thermostats
- Data Center Storage
- Decorative Light Strings
- Dehumidifiers
- Dishwashers
- Displays
- Electric Vehicle Supply Equipment
- Enterprise Servers
- Freezers
- Furnaces
- Geothermal Heat Pumps
- Imaging Equipment

- Laboratory Grade Refrigerators and Freezers
- Lamps
- Light Commercial HVAC
- Luminaires
- Pool Pumps
- Refrigerators
- Room Air Cleaners
- Room Air Conditioners
- Storm Windows
- Telephony
- Televisions
- Uninterruptible Power Supplies
- Vending Machines
- Ventilating Fans
- Water Coolers
- Water Heaters

Methodology:

ENERGY STAR market penetrations for a given year are derived by dividing U.S. ENERGY STAR certified product shipments by total U.S. shipments.

U.S. ENERGY STAR Shipment Data

ENERGY STAR shipment data is collected from program partners for each calendar year. EPA uses this data as the representative value of all ENERGY STAR certified product shipments for the respective year; that is, no adjustments are made to the totals to account for partners that fail to report their shipments. Using the reported data represents a conservative approach. Though this method may underestimate ENERGY STAR market penetration, the data are reliable, and the method is easily replicated. Further, response rates for all collected product categories average approximately 82%. Since many non-responsive partners are no longer shipping ENERGY STAR products, the shipments reported approximate actual ENERGY STAR certified product shipments.

Total U.S. Shipment Data

Total U.S. shipments are based on modeled and documented data. Industry data is used as a direct input whenever available and compared to forecast assumptions to ensure data comparability. Industry sources include trade associations, publications, and commercially-available market research.

Response Rates: Percent of Partners that Submitted Calendar Year (CY) 2021 Unit Shipment Data:

Product Category	Response Rate	Number of Partners Required to Respond

Results:

The goal of the ENERGY STAR program is to reduce greenhouse gas and other emissions associated with avoidable energy consumption by transforming the market for energy-efficient products, buildings and services, so that more energy-efficient options become the norm and persist in the marketplace. As this occurs, EPA looks for additional opportunities to improve efficiency by tightening energy and environmental performance criteria for a given product or service, and revising specifications accordingly.

The below estimates of market penetration for calendar year 2021 provide a key indicator of whether the market is being transformed for a given product, and are used to inform the specification revision process and the annual ENERGY STAR Product Development Workplan. For most products with high market share, new criteria have already been established or are currently being developed.

¹ The number of ENERGY STAR certified products shipped and market penetrations are provided for select, notable subcategories of products. The totals and market penetrations for each main product category may be comprised of additional subcategories.

² For product categories where 2021 Market Penetration reads "N/A", market penetration was unable to be calculated due to a lack of current market data.

³ Market Penetration for Blu-ray Players was updated based on updated market information.

⁴ Market Penetration for Boilers was updated based on updated market information.

⁵ AHRI updated the methodology for collecting data for CY2021 to align with their process for collecting overall market data, so shipments more accurately reflect ES certified combinations of split system installed in homes. This methodology change resulted in a reduction in shipments of 5% for air source heat pumps and 8% for central air conditioners.

¹¹ This includes ENERGY STAR certified lamps as a percentage of all lamps, including fluorescent, incandescent, halogen and solid state. Starting this year, the market data for incandescent and halogen bulbs is only based on U.S. Census import data and assumes that all lamps are being imported to the U.S. It does not account for any products being manufactured and shipped in the U.S.

¹² Market penetration for refrigerators does not include compact products.

¹³ Shipments and market penetration for telephony include corded and cordless analog telephones but do not include additional handsets.

¹⁴ Market Penetration for Room Air Cleaners was updated based on updated market information.

¹⁵ Market Penetration for Storm Windows was updated based on updated market information.

¹⁶ Shipments for ventilating fans do not include in-line ventilating fans.

¹⁷ Shipment data and market penetration for windows, doors, and skylights will not be available until 2023 due to a transition in the data collection process.
