OFFICE OF AIR AND RADIATION

Dear ENERGY STAR® Commercial Food Service Partner and Stakeholder:

The Ask the Experts blog features informational posts on energy efficiency topics in the form of How-To, Did You Know, Q&A, and Innovation & Tech categories. The second CFS Ask the Experts blog, [How to Reduce Refrigeration Energy Costs in Commercial Kitchens](#), was published August 2021 in conjunction with the publication of the [ENERGY STAR Version 5.0 Commercial Refrigerators and Freezers Draft 1 Specification](#). The article includes an overview of commercial refrigeration maintenance tips, energy savings, and common component rebates. Stakeholders are encouraged to share the article broadly to promote your partnership with ENERGY STAR and educate your customers on the benefits of energy efficiency. We encourage you to check out other [Ask the Experts posts](#) and continue to stay up-to-date to learn tips for purchasing, promoting, and selling ENERGY STAR certified products.

If you have any questions or suggestions for future CFS Ask the Experts topics, please email CFS@energystar.gov.

Thank you for your support of ENERGY STAR.
