ENERGY STAR®, a U.S. Environmental Protection Agency program, helps us all save money and protect our environment through energy efficient products and practices. For more information, visit www.energystar.gov.

Dear ENERGY STAR® Small Network Equipment Stakeholders:

The U.S. Environmental Protection Agency (EPA) would like to remind stakeholders that as of January 13, 2022, EPA-recognized certification bodies (CBs) are required to cease certification of new small network equipment (SNE) products to the Version 1.0 specification. Certification bodies may continue submitting administrative modifications to existing small network equipment (SNE) product certifications to the Version 1.0 specification until July 13, 2022. Brand owners must stop using the ENERGY STAR name and ENERGY STAR mark in association with all small network equipment (SNE) products on and after July 13, 2022.

Additionally, no new promotional materials for small network equipment (SNE) products (printed and electronic) that use the ENERGY STAR mark may be produced after January 13, 2022. Brand owners are permitted to use up existing printed material, including packaging, to minimize waste.

Please reference EPA's [Small Network Equipment Products Sunset Decision Memo](#) for more details, and contact EPA at networking@energystar.gov with any questions regarding the specification.

Thank you for your support of the ENERGY STAR program.
