

## ENERGY STAR® RESIDENTIAL NEW CONSTRUCTION PROGRAMS

### DEAR ENERGY STAR PROVIDER PARTNERS,

---

#### **EPA will soon retire the Microsoft Excel-based ENERGY STAR Label and Certificate Printing Tool.**

Over the years, rating software companies have incorporated the functionality to print ENERGY STAR labels and certificates directly from their rating software, and we have received feedback from Providers that the individual and batch label printing options available in software are meeting their needs for producing the required ENERGY STAR program documentation. We encourage Providers who are not already doing so to begin printing their ENERGY STAR labels and certificates directly from the rating software by the end of the year.

Please refer to the following detailed instructions for batch printing of labels and certificates through rating software:

- [Ekotrope – ENERGY STAR Label & Certificate Batch Printing Instructions](#)
- [REM/Rate – ENERGY STAR Label & Certificate Batch Printing Instructions](#)

*This functionality is also available in EnergyGauge and HouseRater™. Please contact their customer support for assistance.*

The Microsoft Excel-based ENERGY STAR Label and Certificate Printing Tool will remain available in your [My ENERGY STAR Account \(MESA\)](#) and can continue to be used to print the previous version of the ENERGY STAR label stock while your supply lasts. However, please note that the Microsoft Excel-based tool does not support printing for the latest version of the ENERGY STAR label. Providers must print the required documentation through rating software once they begin using the latest version. See below for an easy way to distinguish the previous and latest label stock.

**CERTIFIED HOME**  
Independently verified to meet EPA's strict guidelines for energy efficiency.
