1	<p>We would like to confirm the reason and the background of 0.5W (Table 4) for occupancy sensor in Sleep Mode.</p> <p>For example, could you tell us more details about comments from stakeholders?</p>
2	<p>The definition of On Mode Power for Products with ABC enabled by default does not seem to be fully-clarified yet.</p> <p>Could we understand that $P_{on} = 0.2 \times P_{10} + 0.8 \times P_{300}$ (shown in the draft 3)?</p>
