#	Page#	Line #	Description
			Will the EPA also consider Component vendors in joining the Energy Star Partnership agreement? And if so what would
1	3	2	their criteria be?.
			The current Sleep Mode definition does not consider devices that are in a lower power state with their video outputs off but
2	7		still monitoring the front end (processing content), networking, PVR, etc.
3	7	150	Please add "Bluetooth" in the list of control mechanisms
4	7		Instead of "Signal Processing " maybe better to use "Media Signal Processing"
5	9	261	Sleep power mode only seems to have a single power allowance not comprehending other features that could be on
			Recommend the TEC approach for Connected AV devices like Connected Blu-ray devices that offer additional services like
6	9	249	network movie services or internet like features
			Where does a box that supports both Blu-ray playback and internet services movie playback fit? Is it an AV Box or an
7			IPSTB?
			Recommend an additional allowance for audio/video inputs like HDMI, component, pass through video processing, HDMI
8	10		repeater,
9	15	453	Section refers to Tuners but its our understanding there are no Video Tuners in these A/V devices
